The settlers of Oklahoma, want rain, and want it bad.

What is Savannah going to do in regard to a new school-building?

William B. Castle, has been appointed Hawaiian Minister at Washington, in the place of L. A. Thurston.

Senator John B. Gordon, has announced that he is out of politics.

The National encampment of Sons of Veterans will be held at Knoxville in September.

While the Senate was deliberating on the Revenue Bill, Senator Barlett offered a resolution providing for a reward of \$250 on each set of triplets born in the State, but it was ruled out of order.

The work at the Navy Yard has been stopped on account of a lack of funds. Work will not commence again until the first of next month.

Have you noticed that large smile that adorns the countenance of each farmer since the rain? The present warm weather is making the crops grow very fast.

Attorney-General Olney was appointed Secretary of State, in the cabinet and his place is filled by Judge Harmon, of Cincinnati. Cleveland's nomination of Judge Harmon, was a complete surprise.

The inhabitants of Formosa, lately indulged in one of their periodical uprisings, but they were soon discovered they were not dealing with China. The Japs brought them to their senses, in a hurry, and now they are as meek as lambs.

The graduates of our educational institutions are having their day, and they are making good use of it. Where do you find so much wisdom, and wise suggestions, as in the bursts of oratory now heard in the educational halls of our land?

An old farmer, after carefully and prayerfully considering the political and financial situation, made the following confession to his wife: "Things is gettin' mighty mixed, Maudy. The politicians are tryin' to tell the farmers all about farmin' and the farmers are tryin' to teach the politicians, and the result is nobody knows nothin' about nothin'."—Ex.

To the North Pole in a Balloon.

King Oscar, of Sweden, has agreed to furnish the money to fit out an expedition to the north pole. This time the attempt will be made in a balloon, and it is predicted that the north pole will be reached, in forty-eight hours, from the time the expedition starts. The prime object of the expedition is to ascertain whether the north pole is surrounded by land or water.

UP AND DOWN.

The life of Senator Jones, of Nevada, has been a continued romance, says an exchange. One year he is a millionaire and the next he is flat broke. Today he has \$100,000 to his credit, tomorrow he is \$50,000 poorer than when he was born. He is a really brilliant man. He has a remarkable fund of useful information and he can make a good speech on any subject with very little preparation. He is an inveterate stock gambler and always a bull. At one time, about fifteen years ago he was worth \$5,000,000. A severe streak of bad luck followed, and in two years he was broke.

During his final period he presented his wife with \$60,000 worth of diamonds. When he reached the financial zero he asked his wife to lend him the diamonds. She did so. He sold them and invested the proceeds in mining stocks. The venture was lucky, and in less than a year the \$60,000 had increased to \$500,000. He then returned the diamonds to his wife, increased by 25 per cent. Jones is interested in mines in Nevada, California, Arizona and Colorado. His wealth is now in the millions again. Rich or poor, Jones is always happy. He is a firm believer in his own good luck.

Z. J. THOMPSON, Supt.

A Modern Invention.

The Layman boat, a description of which is given in the Scientific American, is one of the most useful as well as original invention for the use of sportsman and visitor of sea-shores and lakes, in late years. It is made of rubber or canvas, and when inflated with air, resembles a tub in appearance. The legs of the user which protrude through the bottom of the vessel, are protected by legs, or boots, made of the same material as the boat and are used to propel the boat in the water leaving both hands free for the handling of either gun or rod by the sportsman.

The boat is thoroughly seaworthy. A party including a lady, passed through the Hell-Gate at New York without shipping any water.

A Correction.

I stated through the columns of the COURIER that I would hold a Teachers Institute in Savannah, but the College having been burned and I failing to obtain a suitable building in which to hold the same, have decided to hold one for the West side of the river, on June 20, 21 and 22, at Morris Chapel, and at Nixon on the 27, 28 and 29, for the East side of the river.

I will hold one in Savannah, at the Newtown College, for the colored teachers on July 12 and 13

J. H. RONE.

Savannah as a Summer Resort.

The beautiful country round about Savannah is drawing a large number of visitors to this place, as will be seen by glancing over the local columns of the COURIER.

We have so many healthful and interesting points in the near vicinity, such as the Sulphur and Chalybeate Springs, Horse Creek, Bluff Spring; not to mention the little Tennessee, nor the numerous wide springs to be found wherever one goes, all reached by short and pleasant drives, which require but little attention to make them the best of highways. The many streams and springs, hills and woods, furnish unexcelled advantages for camping parties. In fact, our surroundings, if placed where he could enjoy them, would make the average man of the city as frisky as a yearling calf.

The average inhabitant of the larger towns and cities, longs to get away from the hot and noisy streets, and for a chance to get into the country and enjoy himself; to take his family where they will grow stout and fat, where his children can play and romp without fear of dray or street-car; but as he contemplates this pleasant picture, his hopes are blasted by the thought of the enormous cost of living at some "summer-resort."

It is not necessary to charge unreasonable prices in order to have a summer-resort.

Those who come from the cities prefer the milk butter eggs, and vegetables of the country, above all other foods. They do not want luxurious and costly accommodations, they prefer to live in a plain and simple manner.

Savannah and the surrounding country possess all the advantages of making a summer resort, that cannot be excelled. Cheap living and a fine country, is what we can furnish to all who seek relief from the hot streets of the cities, and the extravagant prices of the average "summer resort."

Savannah won't destroy the restored nerves, and appetite by a double price.

Why not make this neighborhood, the Eldorado, of the poor man, of the city?

Eleven Million

Dollars Capital is the amount represented by Jas. Williams Agt., to secure you indemnity against loss or damage by fire, lightning and cyclones. Go and protect yourselves now.
